Base 63mm x 63mm depth 24mm

INSTALLATION NOTES

When fixing outdoor fittings to a wall a bead of silicone is required around the base to maintain the IP rating of the product. This also applies to the holes around the fixing screws. All silicone and rubber washers and O'rings supplied with the fittings must be in place around the base and fixing screws when installing the product. If missing please contact your supplier for replacements prior to installing the product. Failure to install outdoor fittings correctly will void any warranty.
